

Speed time to value with public and hybrid cloud

Accelerate the transition and maximize your operations with public and hybrid cloud.

Optum provides health care-safe, modern infrastructure and platform services that deliver agility, growth and innovation. Clients can leverage all facets of one of the industry's most comprehensive cloud-based solutions designed exclusively for health care. Our cloud services encompass the following offerings:

- **Cloud readiness assessment:** Review application portfolio and infrastructure for cloud migration opportunities
- **Application migration:** Modernize and accelerate application migration and workloads to the cloud
- **Disaster recovery:** Leverage public cloud for enterprise back-up and disaster recovery
- **Security assessment:** HITRUST-based assessment for cyber readiness and posture
- **Cloud Managed Services for your public cloud instance:** Configuration, administration, tuning and maintenance of cloud infrastructure and platform services
- **OptumCloud Services:** Management of all cloud resources and infrastructures, including monitoring, security controls and automated deployments of infrastructures in a PHI/PII/PCI protected environment

Benefits of Optum Cloud Services:

- Provides unique (fully automated) PHI/PII/PCI protected cloud environment
- Supports, secures and scales your cloud journey
- Leverages public cloud for enterprise back-up and disaster recovery

63%

of health systems currently run less than 25% of workloads in a public cloud¹

The cloud drives enablement

John Muir Health's (JMH) goal is to modernize and optimize its information technology services by using the cloud as a central driver in delivering on its promise to its patients.

JMH evaluated its applications and moved workloads, back-ups and disaster recovery to the cloud.

JMH is leveraging OptumCloud for the back-up of EHR data and modules and deploying cloud-based technology to support critical applications.

“Digital transformation is so much more than the latest – or shiniest – technology. It’s really about enablement. The cloud is a key driver, and it supports our journey to create meaningful patient experiences by leveraging the power of technology to deliver better outcomes.”

“We value that OptumCloud is very secure. It also reduces downtime which is critical in our business.”

Deedee Francisco, Optum Vice President of IT (Lead IT Support for JMH)

Services used: *Optum Cloud, Cloud Managed Services, Cloud Readiness, Application Migration, Disaster Recovery*

To digitally transform health care, Optum IT Performance as a Service (ITPaaS) helps organizations:

- Power cloud transformation
- Improve their security posture
- Accelerate application development and technology modernization
- Optimize and manage infrastructure and core systems

The “as a Service” consumption model delivers health care-specialized, scalable services in four areas: cloud, security, application development and applications management.

As a health care leader, we drive innovation and our own business by ongoing, substantial investments in technology and continued optimization of critical processes. Our ITPaaS offering extends these same capabilities to you.
